Pizza Palooza

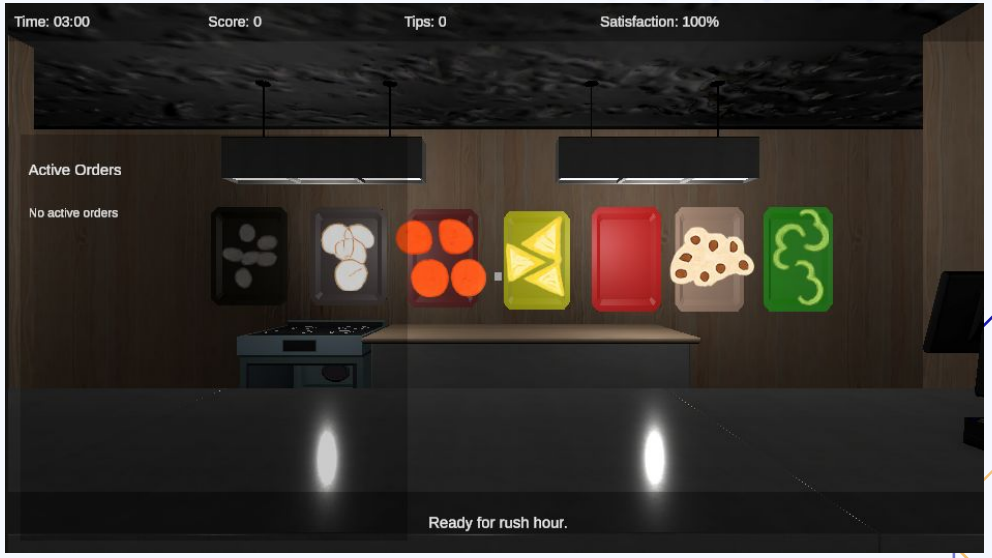
Studio 4: Yusuf Nasimi, Joshua Desroches, Gabriel Nogueira, Jaycob Branco

COMP395-001

April 21, 2026

What is Pizza Palooza

- First-person, quickly paced pizzeria simulator
- Focus on timing, multitasking & precision
- Designed to simulate high pressure workflow



Our Studio’s Approach

Plan

Set goals of the simulation-game

Distribute

Give work to each studio member

Execute

Everyone implement their respective portions

Communication

Discord - Messaging
GitHub - Version Control
Google Docs - Documentation

How its Made?

Pizza Toppings

Toppings spawn from dispenser and are dragable to table.

Pizza Building Table

Instatiates the pizza game object with relevant toppings.

Pizza Object

Contains decals of each topping which gets enabled or disabled.

Ordering

Spawns orders, tracks patience, scores deliveries.

Cooking

Oven changes pizza state from raw -> cooked -> burnt.

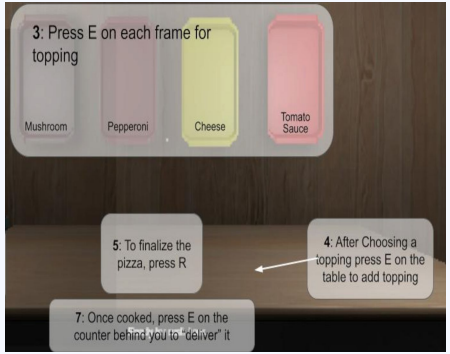
Difficulty

Difficulty is dynamic, allowing for increase in variables across levels.

Playtest Feedback

Confusing Gameplay

- Unlabeled Toppings
- No sound effects/music



Finicky Controls

- Controls not flexible during use
- Ways to get stuck with inputs

Several Bugs

- Main Menu freezing
- Ingredient Mess

Future Ideas

01

Actual Customer GOs

Actual immersive customers who are in the store

02

Angry customers

Customers have individual satisfaction meters and attack you
